

IPv6 at Yahoo: growth, disparity

Large content network: we see traffic from eyeball networks

Two main datasets I watch:

- HTTP logging
- Mobile data reporting to Splunk

IPv6 at Yahoo: growth, disparity

Countries:

- BE: 40.4%
- CH: 26.0%
- US: 22.6%
- FI: 20.7%
- DE: 19.0%

Mobile:

- Android: 10.8%
- ... over LTE: 26.5%
- ... on one network: 87.0%

IPv6 at Yahoo: growth, disparity

Must stop thinking of the IPv4 space as “the internet”
